

Plains Midstream Canada is engaged in crude oil gathering, transportation and marketing activities within Alberta, Saskatchewan and Manitoba. Plains is also active in LPG marketing, production and storage in Canada and the USA. Fueled by our strong management team and dedicated employee base, Plains has sustained strong growth and has aggressive development plans for the future. We are looking for highly motivated individuals who enjoy working as part of a team in a dynamic and entrepreneurial work environment.

## **Controls and Automation Supervisor - Northwest District (Alberta)**

Plains is currently looking to fill the position of a Controls and Automation Supervisor in Fort Saskatchewan. The successful candidate will report to the District Maintenance Manager and provide oversight to a team that is responsible for a variety of PLC's and DCS's for our Northwest Pipeline, High Prairie Fractionation facility and Fort Saskatchewan Fractionation facility.

### **Responsibilities:**

- Ensure employees and contractors are properly trained, competent and evaluated regularly
- Hire and supervise tradesmen to safely execute maintenance activities
- Conduct meaningful and timely employee performance reviews and manage people towards a culture of high performance
- Evaluate and integrate contractor utilization to support the overall Maintenance & Reliability program, equipment availability targets and business objectives
- Manage change through effective communication, risk assessment, training, coaching, and knowledge transfer
- Assist in developing and maintaining the Controls and Automation portion of the Maintenance OPEX budget for area of responsibility
- Provide approval for Materials and Service requisitions
- Work with Operations Team Leads and Engineering to identify cost saving opportunities
- Communicate and reinforce the PFS Maintenance vision and goals to site EI&C technicians and contractors
- Work closely with the Area Maintenance Manager to ensure maintenance strategies are aligned
- Ensure technicians are putting actual hours, detailed log, attaching QA/QC documentation and field completing work orders
- Execute all Urgent and emergency work orders
- Managing Daily Maintenance, in accordance with District Work Management Flow
- Utilize skilled trades to efficiently execute planned work on the maintenance schedule.
- Program Rockwell PLCs (Control Logix, PLC5..) – Discrete and analog control logic associated with processing and transporting of hydrocarbons
- Perform preventative maintenance on electronic devices such as computers, PLCs, and RTUs;
- Program and configure Rockwell RSView systems
- Support the PMC ATW process
- Maintain 100% compliance with PMC core safety training

### **Qualifications:**

- High School diploma;
- Post-secondary education (Electronics Technology);
- At least 3 years of experience in programming logic controllers;
- Training on Rockwell programmable logic controllers is an asset;
- Skillful knowledge of PLC programming;
