### Position and Responsibilities

To achieve excellence in physical asset management and improve reliability at its operations, Cameco has formed an asset management & reliability centre of excellence to develop systems and standards and deliver specialised services to the organisation.

Reporting to the director, asset management and reliability, you will be responsible for overseeing a team of practitioners delivering several reliability services to the organisation including those related to reliability engineering (e.g. maintenance strategy development), asset health and condition monitoring, and asset master data management. You will also be responsible for developing and maintaining related business processes and supporting technical standards and procedures, as well as managing supporting enterprise systems, such as the company's asset performance management (APM) various predictive maintenance systems.

Although this position is based at the Saskatoon office, occasional travel to various sites may be required.

### Education and Qualifications

Requirements of the position:

- Bachelor's degree in engineering or applied science
- Minimum of 12 years of relevant work experience, preferably in an asset-intensive industry (e.g. mining, oil & gas, etc.)
- You must be eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)
- Experience with EAM and APM systems
- Excellent public speaking and presentation skills
- Strong data analytics background

Assets:

- Certification in any or all of the following: Reliability-Centered Maintenance (RCMII), Risk-based Inspection, Root Cause Failure Analysis, Lean, Agile, Six Sigma, Maintenance Management (e.g. PEMAC MMP), Change Management (e.g. PROSCI)
- Proficiency with SAP Plant Maintenance, Bentley AssetWise
- Experience in Digital Transformation initiatives, IIoT, and Predictive Maintenance systems
- Excellent communication and change management skills
