

Come Live Our Values

Manager, Asset Master Data Management

Saskatoon, SK

Position and Responsibilities

Reporting to the director, asset management and reliability, you will be responsible EAM master data governance, including the development, implementation, and continuous improvement of master data standards and data management business processes to achieve and sustain master data quality as it relates to physical assets. Through a team of EAM master data professionals, you will also deliver master data services to the organisation, including but not limited to the creation and maintenance of asset master data (e.g., asset hierarchy, equipment records and maintenance management data) through its complete life cycle. In this capacity, you will be the main point of contact for projects generating new master data, and lead master data improvement projects.

We offer:

- competitive pay
- superior benefits
- employee share ownership plan for all employees
- Live Better wellness program

Cameco values diversity. In keeping with this principle and our employment equity goals, we particularly encourage qualified applicants from the designated equity groups to apply.

*To explore this career opportunity, please visit <https://career17.sapsf.com/sfcareer/jobreqcareer?jobId=36247&company=Cameco>. Deadline for applications is **November 4, 2021**. Please quote competition number **36247**.*

You will have the opportunity to work remote in this position. However, there may be the need for intermittent meetings in the Saskatoon office or at one of our other work locations. The details of this flex work arrangement will be discussed with you in the recruitment process.

At Cameco we understand the value of a diverse workforce and we embrace, encourage and support workplace inclusion and diversity. New ideas, perspectives, experiences and expertise make Cameco stronger. Our vision is to create a culture where inclusion is the goal, and a diverse and representative workforce is our measure of success.

Education and Qualifications

Requirements of the position:

- Degree in business administration, engineering, or computer technology
- Minimum of 10 years of relevant work experience preferably in an asset intensive industry.
- Equivalent combination of education and work experience considered
- Experience with SAP-PM (Plant Maintenance) system
- Data analytics and reporting skills
- Strong leadership, communication, & influential skills with ability to drive change
- Ability to travel by air periodically to remote operations

Assets:

- Experience with SAP Master Data Governance, SAP Information Steward, SAP Data Intelligence Cloud, Microsoft Power BI, Bentley AssetWise, or similar solutions
- Experience with Digital Transformation initiatives
- Working knowledge of applicable Asset/EAM master data standards such as ISO 14224, ISO 8000, etc.
- Certification in one or more of the following: Maintenance Management Professional (MMP), Certified Maintenance & Reliability Professional (CMRP), Lean/Six Sigma, Master Data Governance
